

CRC 732 X

INTRO

Flap Disc Cloth
 Grit Format: Hybrid
 Available Grit Range: P36 ~ P120

CONSTRUCTION

Cloth Type: Polyester and Cotton Hybrid
 Bonding: Top-size with Cool-Ag over Resin over Resin
 Grain Type: Ceramic Hybrid

Converted Materials: Flap Discs
 Maximum Width: 1650mm

PRODUCTS ADVANTAGE

- Double performance ceramic grains with high aggressive performance
- Can work on every type of pressure application as a universal product
- Chemically enhanced resin formula to provide cooler grinding for longer life
- Chemically enhanced top-size formula for controlled grain sharpness

APPLICATION

- Can grind on edge surfaces and thick welds that apply single point high pressures
- Can also grind on surfaces and provide good quality surface material removal
- Preferred machinery is high watt machines working with high RPM
- May be used as a universal product for grinding of each location of the work piece
- Works best on stainless steel edges weld removal and deburring

MOST COMMON GRIT CONSUMPTION

P36	P40	P50	P60	P80	P100	P120
